

## ANESTHETIC CONSENT

I hereby authorize Maryville Animal Hospital, Inc., to perform upon \_\_\_\_\_

the following procedure(s): \_\_\_\_\_

and if any unforeseen condition arises in addition to, or different from, those now contemplated while my pet is under anesthesia, I authorize the doctors of Maryville Animal Hospital, Inc., to initiate preliminary care pending my notification. In the event of an emergency or if I cannot be reached, I authorize the attending doctor to do what they feel is necessary for my pet's safety and well-being.

By signing this form, I release Maryville Animal Hospital, Inc., and staff from all liability in the unlikely event of a complication.

### PRE-ANESTHETIC BLOODWORK

Heartworm disease can present a significant anesthetic risk in dogs; therefore, we require that dogs be negative and current on their heartworm test and/or preventative prior to anesthesia.

**I UNDERSTAND MY DOG WILL BE TESTED FOR HEARTWORMS IF NOT CURRENT (\$38) \_\_\_\_\_**

### VACCINATIONS/FECAL EXAM

We require that all pets staying in our hospital be up-to-date on vaccinations and have had a current intestinal parasite exam to prevent the spread of disease. If not current, your pet will be vaccinated during the stay. Dogs are required to have Rabies, Da2PP, and Bordetella. Cats are required to have Rabies and FVRCP. Your pet will receive an intestinal parasite test (\$17) if not currently negative.

**MICROCHIP  
(\$30)**

While we all hope that a microchip will never be needed for your pet, accidents do happen and it is better to be prepared. A microchip can be implanted in your pet to help aid in recovery if ever lost. Microchipped dogs are 3 times more likely to be reunited with their humans, and cats are 20 times more likely to find their home!

Please initial below if you would like your pet microchipped at the discounted price of \$30 (regularly \$45).

**PLEASE MICROCHIP MY PET** \_\_\_\_\_
